

## PacMMS Sea Traffic Management Departure Report

The container vessel queuing process for assignment of labor in ports is now based on a vessel's departure time (UTC) from its Last Port of Call (LPOC). After enrolling with Pacific Maritime Management Services (PacMMS) use the online departure form to report your estimated and actual departure times: <https://www.pacmms.org/departure>.

If you cannot access the website, complete the following form and email it to: [queuing@pacmms.org](mailto:queuing@pacmms.org). Be sure to add this address to your vessel's email whitelist to ensure successful follow-on communication.
